

Duration

3/2025-2/2028

Total budget

€ 3.70 Million

EU funding

€ 2.96 Million

Circ@Home

Circ@Home brings together **households, local services, and municipalities** to shape the transition to a **circular and sustainable way of living**. The project develops practical, everyday **solutions** and local **circularity hubs** to reduce waste, save resources and encourage climate-friendly habits. The goal: Circularity becomes accessible, understandable and doable for everyone.

This **#MadeWithInterreg** project supports the transition to a circular and resilient Baltic Sea Region. Organizations from these countries are working together to make it happen:
Estonia, Finland, Germany, Latvia, Sweden.
